Hello friends: as you have heard me report on the Monday afternoon calls, Region 2 is doing a lot of work on the methyl bromide situation in the USVI. Yesterday, marks 3 weeks since the incident that has affected the family from Delaware. EPA is doing a comprehensive investigation. Lou Pieh is playing a pivotal role in hq and he wants to make sure we keep the RA's fully informed. I will continue to provide verbal updates on the Monday afternoon calls. In addition, I thought I would add your name to the circulation list for the POLREPs, which come out about 3 times per week. I think that is the easiest way to stay on top of the details. I will add your name to the circulation list unless I hear from you that you do not want to receive the POLREPs. You can decide who in your region you want to forward it to, but I would recommend that you not send it to a long list of people. And of course you can call or email me or Catherine mccabe at any time.
